EXPERIENCE SUMMARY (9 years)

- **apollo.io** *[Senior Frontend Engineer, December '23 - ongoing]*
  - Contributed to platform frontend initiatives, including setting up GitHub CI workflows for npm dependency healths, test frameworks(cypress) and performance profiling and many more. **Tech Stack:** Webpack, Cypress, GitHub Actions, Vite, Vitest, Playwright
  - Improved web vitals mainly LCP by 3 seconds, by removing a dependency from a very slow to load API from multiple places in the app. **Tech Stack:** React, Redux
  - Contributed to revamping of leads page which is 80% usecase of apollo. Now it uses config driven filters which has made it very easy to maintain and develop new filters. **Tech Stack:** React, Redux, Cypress, Vitest

- **interface.ai** *[Software Development Engineer, - III February '23 - December '23]*
  - Implemented major upgrade interface.ai chat bot UI, released latest version to multiple clients. **Tech Stack:** React, NodeJS
  - Developed Academy application to handle holiday/working hours management. **Tech Stack:** React, NodeJS, NX

- **Coinbase India** *[Software Engineer, October '21 - January '23]*
  - Developed in-house tool to setup, modify, and track A/B experiments. It is the most used internal tool at entire Coinbase. **Tech Stack:** React, Jest

- **Myntra Designs Pvt Ltd** *[Senior Software Engineer, April '20 - October '21]*
  - Built multiple components in the in-house UI component library with unit tests and auto-generated documentation. This theme-able library is built using Myntra's design principles. It is being widely used internally to build consistent UI applications. **Tech Stack:** React, Jest, Enzyme
  - Lead 'Onboarding system' project, which is being used to onboard new sellers on Myntra platform. Built as a replacement of the third party solution. Team consisted of 5 members including me as the lead and 4 other developers. My responsibilities were designing HLD, LLD, code reviews, task breakdown and delegation, sprint planning and individual contribution as well. This system has integrations with multiple third parties for documents verification. Also supports e-signing over digital contracts. This system helped in bringing down onboarding TAT from 60 days to 13 days. **Tech Stack:** React, Redux, NodeJS, ExpressJS, MongoDB, Redis, RabbitMQ

- **Myntra Designs Pvt Ltd** *[Software Engineer, Feb '18 - March '20]*
  - Developed and standardised deployment procedure for all UI apps at Myntra. The project was widely recognised and adopted across Myntra. **Tech Stack:** Gradle, Shell Script, Azure Storage, MySQL, NodeJS, Webpack

- **Avizva Solutions Pvt Ltd** *[Associate FrontEnd Engineering- L1, July '16 - Feb '18]*
  - Developed application for a US based group insurance giant. In this application users could top-up their current insurance, buy or upgrade health plans. Add dependants and raise claims. **Tech Stack:** React, Redux

TECHNICAL SKILLS

- **Programming Languages**: JavaScript, HTML, CSS, Golang
- **Web Application Development Frameworks**: Webpack, Vite, React, Redux, Cypress, Playwright, Vitest
- **Databases**: MongoDB, Elasticsearch, Redis

ACADEMICS

Examination	Institute	Year
B.Tech.	MANIT Bhopal	2016
